

Biodiversity Protection Policy

1. Purpose

The purpose of this policy is to define Zeyt Inn Hotel's approach and practices regarding the protection of biodiversity.

2. Definition

Biodiversity refers to the natural richness that includes genetic diversity, species diversity, and ecosystem diversity. Its protection is essential for a healthy environment and quality of life.

3. Scope

This policy covers all activities of the hotel, as well as its suppliers and business partners.

4. Responsibilities

Zeyt Inn Hotel management is responsible for the implementation and development of this policy. All employees, suppliers, and business partners act in accordance with this policy.

5. Policy

As Zeyt Inn Hotel, we consider the protection of biodiversity an important part of our sustainability approach.

In this context;

- We identify and control the impacts of our activities on biodiversity.
- We avoid practices that may pose a threat to endangered species and natural life.
- We support practices that contribute to the protection of natural resources.
- We develop initiatives to protect the local ecosystem.
- We raise awareness among our employees and guests about biodiversity.
- We take necessary steps for the protection and monitoring of local species.
- We support local agriculture and production activities to contribute to sustainable development.
