

## **Sustainable Procurement Policy**

In line with our sustainable supply approach, we expect our suppliers/solution partners to:

- Have Quality Assurance Management Systems, Environmental and Occupational Health and Safety Management Systems, and internationally recognized environmental and sustainability labels/certifications,
- Ensure that their production and supply processes do not harm the environment and comply with environmental regulations,
- Use resources appropriately without harming natural life and ecosystems and comply with hunting bans,
- Work to minimize waste and manage it properly, and offer reduced or bulk packaging alternatives,
- Provide environmentally friendly, resource-efficient, local, ethically responsible, recyclable or recycled materials, Fair Trade, organic, bio, vegan, cruelty-free products that do not contain harmful chemical components,
- Be local and domestic producers/service providers,
- Offer products/services that reflect and promote the cuisine, traditions, and culture of our country/region.

We value these principles and communicate this perspective to our stakeholders and suppliers. Together with our suppliers, we aim to create efficient procurement opportunities and reduce the environmental impact arising from supply processes.
